

TEACHER TALK

We are amazed by the growth that we have been noticing with each of our students. They are now on the second half of their kindergarten year and are making drastic strides in their academics. It is so rewarding to see their excitement during lessons as they grasp new skills daily! We would like to thank our parents for extending that encouragement and taking the time at home to practice new skills. Our students' accomplishments wouldn't be possible without your support! Team work makes the dream work!
